

MAUER

ASSA ABLOY

The MLP profile cylinder is of very high standard and with a technical patent until 2036. With the advantage of having 6 pins (new silver), complex locking systems can easily be planned and maintained, without the risk of being compromised.

Because of the use of key code registration and the associated certificate the MLP cylinder is perfect for buildings that need to be secured. Therefore it is especially suited for large master key systems, as well as single differs.

Each cylinder is issued with a key code registration card.

MLP

Higher standard and durable profile cylinder
